

## Head Start Family Outcome 2021-2022

### Family Outcomes:

Family progress checkpoints were obtained three times through the span of September 2021-August 2022. New families enroll into Head Start throughout the year at different times allowing some families to only have one or two check points, though all still can achieve progress!

The life areas represented in the chart are tied to the National Head Start “Parent, Family, and Community Engagement Framework (PFCE)” Family Outcomes.

Two hundred seventy-three families completed two or more assessments and are represented in this graph. Of those families, one seventy-four or 64% reported an increase on the matrix scale. Through strengths-based partnerships with families, many families reported gains and increased their level of stability. Some individual families gained in numbers as high as 11 & 11.2 points across the board.
